SERIES OF 2021 AND ERC **RESOLUTION NO. 14, SERIES OF 2022**

ERC CASE NO. 2024-019 CF

ORDER

On 09 May 2024, Antique Electric Cooperative, Inc. (ANTECO) filed an *Application* dated 18 April 2024, for approval of calculations of over or under recoveries in the implementation of automatic cost adjustments and true-up mechanisms for the period 2021 to 2023, pursuant to corresponding confirmation process pursuant to ERC Resolution No. 16, Series of 2009, as amended by Resolution No. 21, Series of 2010, ERC Resolution No. 23, Series of 2010, ERC Resolution No. 02, Series of 2021 and ERC Resolution No. 14, Series of 2022.

The pertinent allegations of the *Application* are hereunder quoted as follows:

THE APPLICANT

- 1. ANTECO is a non-stock, non-profit electric cooperative, duly organized and existing under and by virtue of the laws of the Republid of the Philippines, with principal office at Brgy. Funda, San Jose de Buenavista, Antique;
- 2. It holds an exclusive franchise issued by the National Electrification Commission to operate an electric light and power distribution service in the municipalities of Anini-y, Tobias Fornier, Hamtic, Sibalom, San Jose de Buenavista, San Remegio, Belison, Patnongon, Bugasong, Valderrama, Barbaza, Laua-an, Tibiao, Culasi, Sebaste and Caluya, all in the province of Antique.

LEGAL BASES FOR THE APPLICATION

- ERC Resolution No. 16, Series of 2009 as amended by 3. Resolution No. 21, Series of 2010 establishes the procedure for the automatic recovery or refund of pass through costs and the confirmation process that would govern the automatic cost adjustment and true-up mechanisms approved by the Honorable Commission, with the objective of ensuring appropriate recovery of the pass through costs in an efficient manner and to put in place a fair and transparent process for the confirmation of the automatic cost adjustments implemented by distribution utilities and the true-up of other pass-through charges, involving Generation Transmission Rate, System Loss Rate and Lifeline Rate Recovery, as the case may be;
- 4. On the other hand, ERC Resolution 23, Series of 2010 adopts the rules implementing the discounts to qualified senior citizen end-users and subsidy from subsidizing end-users on electricity consumption;
- 5. Further, ERC Resolution No. 02, Series of 2021, provides for the recovery of all just and reasonable costs pertaining to current taxes (real property, local franchise, and business tax) that are levied by local government units within the distribution utilities' franchise area, subject to the post-validation and confirmation process mechanism of the Commission.
- 6. Finally, ERC Resolution No. 14, Series of 2022, directs the distribution utilities to adopt the Revised Rules governing the automatic cost adjustment and true-up mechanisms and corresponding confirmation process for DUs with its revised Uniform Reportorial Requirement (URR) spreadsheet template.

- 7. From the foregoing Resolutions, ANTECO opted not to recover the costs pertaining to the real property tax, local franchise tax, and business tax that were levied by and paid to certain local government units in its franchise area.
- 8. Foregoing resolutions further require the distribution utilities to file their respective consolidated applications once every three (3) years.
- 9. Hence, the filing of the instant application, covering the period of January 2021 to December 2023.

OVER OR UNDER-RECOVERIES OF ALLOWABLE COSTS

- 10. Applying the formulae provided under Resolution No. 16, Series of 2009 as amended by Resolution No. 21, Series of 2010, Resolution No. 23, Series of 2010, Resolution No. 02, Series of 2021, and ERC Resolution No. 14, Series of 2022, respectively, ANTECO made calculations of the over-recoveries charged or under-recoveries incurred as against its customers, in the implementation of certain automatic cost adjustments and true-up mechanisms, covering the period of January 2021 to December 2023;
- 11. The results of its calculations are presented hereunder, as follows:

Mechanism	Recoverable Cost (PhP)	Actual Revenue (PhP)	(Over)/Under Recovery(PhP)

Net Amount			(33,625,796.58)

REASONS FOR THE OVER/UNDER - RECOVERIES

12. In the case of the Generation Rate, ANTECO incurred an under-recovery due to the following reasons:

- a. There are variable factors present in the power supplier's bill that fluctuate over time especially for the year 2022, increase in fuel prices, foreign exchange, market dynamics and changes in regulatory policies;
- b. Since ANTECO is a direct member of the Wholesale Electricity Spot Market (WESM) and where it is getting a percentage of its supply, the risk of exposure to the vulnerability of the fluctuations in prices of the spot market is a factor that contributes to the generation cost;
- c. The formula for the calculation of generation cost follows a one-month lag approach, where the cost of power for the current month is being recovered in the following month;
- d. The calculation formula for the monthly generation rate in years 2021-2022 was derived from ERC Resolution No. 16, Series of 2009. On the other hand, the recent ERC Resolution No. 14, Series of 2022, issued on December 19, 2022 introduced a new formula for calculating monthly generation rate and over/under-recovery. The variance between the Total kWh Purchased and Generated compared to Total Energy Input has led to an additional under-recovery in generation costs.
- 13. For the Transmission Rate, ANTECO incurred an over recovery due to the calculation formula for the monthly transmission rate differing from the formula used for over/under-recovery purposes. Additionally, the monthly calculation of the transmission costs follows a one-month lag approach, where the cost of power from the previous month is used for the current month's computation;
- 14. For the System Loss Rate, ANTECO incurred an underrecovery. The calculation of System Loss Rate over/underrecoveries was primarily attributed to the over/underrecoveries in Generation and Transmission Costs which are major components of the formula used to compute the System Loss Rate. Additionally, the calculation formula for the monthly system loss rate differs from the formula used for over/under recovery purposes;
- 15. For the Lifeline Discount and Subsidy, ANTECO incurred an over-recovery due to the calculation following a one-month lag approach and variation in the monthly calculated lifeline rate, which is affected by actual kWh consumption of lifeliners and non-lifeliners;
- 16. For the Senior Citizen Discount and Subsidy, ANTECO incurred an over recovery due to calculation following a onemonth lag approach.
